PROJECT GUIDELINES

SLIDE 1: Project Title & Team Details

- Project Title
- Student Names and Roll Numbers
- Department
- Project Guide
- Academic Year

Expected:

- Approved project title
- Same title approved during Zeroth Review
- Professional formatting

SLIDE 2: Problem Statement

SLIDE 3: Objectives

Expected: Include at least three clear objectives. The objectives, when considered together, should address the stated problem.

SLIDE 4: Project Overview

Provide a concise summary of the project.

Include:

- Engineering Problem
- Motivation
- Need for the project
- Target users
- Scope of the project
- Expected impact

Expected: The audience should understand the complete project in less than two minutes.

SLIDE 5: System requirements and design

- Overall system architecture
- Module diagram/block diagram

SLIDE 6: Methodology

Explain the complete methodology.Include the following

- Flowchart
- Algorithm
- Processing Steps
- Workflow

In addition to the above, include only the applicable items from the cases listed below

AI Project

- Dataset
- Pre-processing

- Training
- Testing
- Deployment

Hardware Project

- Sensor Interface
- Control Logic
- Communication
- Actuation

Expected

Students should explain every step logically. Show interaction between modules.

SLIDE 7: Technology used

Explain

- Hardware
- Software
- Programming Languages
- IDE
- Simulation Software
- Cloud Platform
- Libraries
- Frameworks
- Database
- Protocols

Expected

Students should justify why each technology was selected. (Choose only applicable)

SLIDE 8: Results

- Simulation Results
- Prototype Images
- Screenshots
- Sample Outputs
- Graphs
- Performance Indicators
- Comparison with expected output

Expected

Show evidence that implementation is working.(Choose only applicable)

SLIDE 9: References

Minimum: 10–15 References

Expected: Only references actually used during implementation.
